

GovOS — User Personas, Workflows & Lifecycles

Government Operations System (GovOS) serves a multi-tiered hierarchy of municipal government stakeholders. Each persona operates within strict role boundaries enforced by RBAC and Multi-Tenant Architecture (MTAS).

Persona 1: Super Admin

Role Code: SUPER_ADMIN

System Scope: Cross-tenant (all municipalities)

Profile

Attribute	Detail
Who	Platform operator
Goal	Provision tenants, manage platform health
Pain Point	Needs full visibility without being inside any specific municipality
Device	Desktop only

Capabilities

- Provision new municipal tenants
- Access all data across all tenants
- Manage platform-level roles
- View platform-wide audit logs

Lifecycle

Platform Setup → Tenant Provisioning → Assign TENANT_ADMIN → Monitor → Offboard Tenant

Key Workflows

1. **Onboard a Municipality:** Create tenant → Configure subdomain → Create TENANT_ADMIN user → Send credentials
2. **Cross-Tenant Audit:** View all tenants → Select tenant → Drill into audit log
3. **Deactivate Tenant:** Soft-delete all tenant data → Revoke all JWTs for tenant

Persona 2: Tenant Admin (Municipal Commissioner / Administrator)

Role Code: TENANT_ADMIN

System Scope: Single municipality (tenant)

Profile

Attribute	Detail
Who	Municipal Commissioner, IT Administrator
Goal	Configure the system, manage staff, track performance
Pain Point	Manual spreadsheets, paper-based reporting
Device	Desktop, tablet

Capabilities

- Manage Roles & Permissions for the municipality
- Onboard/offboard Officers and Dept Heads
- Configure ward boundaries and departments
- View analytics dashboard and audit logs
- Access all modules

Lifecycle

Receives credentials → System Setup → Staff Onboarding → Daily Operations Monitoring → Report Generation

Key Workflows

1. Onboard an Officer

None

Admin Console → User Management → Add Officer →
Fill: Name, Phone, Designation, Ward Assignment, Role
→ Officer receives OTP login credentials

2. Monitor Daily Operations

None

Dashboard → Review KPIs (Complaints, Citizens, Projects, Assets) →
Drill into Complaints → Filter by status/ward →
Identify SLA breaches → Reassign Officer

3. Generate Monthly Report

None

Analytics → Command Center → Export PDF →
Review: Resolution Rate, Budget Burn, Satisfaction Score

4. Configure System

None

Admin Console → Tenant Configuration →
Set ward boundaries (via Map module) →
Configure department structure →
Set SLA thresholds

 Persona 3: Officer (Field Officer / Ward Officer)

Role Code: OFFICER
System Scope: Assigned ward(s) within a tenant

Profile

Attribute	Detail
Who	Field officer, ward officer, sanitation inspector
Goal	Resolve citizen complaints, update asset status
Pain Point	Manual complaint diaries, no real-time updates

Attribute	Detail
Device	Mobile-first, smartphone browser

Capabilities

- View complaints assigned to them
- Update complaint status (IN_PROGRESS → RESOLVED)
- Add citizens to the system
- View and update documents (file movement)
- View map of their ward
- Receive real-time Socket.IO notifications

Lifecycle

Login → See Assigned Complaints → Accept/Update → Field Work → Mark Resolved → Log Activity

Key Workflows

1. Morning Duty Check

None

Login → Dashboard (2 KPIs: Complaints, Projects) →
 Check Complaints Module →
 Filter: My Ward + Status=ASSIGNED →
 Review priority queue → Plan field visit schedule

2. Resolve a Complaint

None

Complaints → Select complaint → Review details + GPS location →
 Click "Update Status" → Select IN_PROGRESS →
 Field work done →
 Click "Update Status" → Select RESOLVED →
 Citizen gets notification (SMS/In-App)

3. Add a New Citizen

None

Citizens → Add Citizen →
Enter: Name, Phone, Ward, Address →
Save → System generates citizen profile

4. Move a Document (Peshi)

None

Documents → Select file →
Click Edit → Update "Current Desk" →
Change Status to IN_TRANSIT → Save →
Receiving officer gets notification

Persona 4: Department Head

Role Code: DEPT_HEAD

System Scope: Assigned department within a tenant

Profile

Attribute	Detail
Who	Water supply head, road works head, parks director
Goal	Oversee projects and assets in their department
Pain Point	No visibility into asset condition and project burn rate
Device	Desktop

Capabilities

- Full CRUD on Assets (infrastructure they own)
- Full CRUD on Projects (department projects)
- View and manage Documents
- View analytics for their department
- Cannot manage officers or citizens

Lifecycle

Login → Review Projects → Check Asset Status → Approve Documents → Budget Review

Key Workflows

1. Register a New Asset

None

Asset Registry → Add Asset →
Enter: Name, Category, GPS, Maintenance Date →
Save → Asset gets tracked with RLS

2. Update Project Progress

None

Project Tracker → Select project →
Click Edit → Update Completion % → Update Spent amount →
Change Status if needed → Save →
Dashboard KPI auto-updates

3. Review Overdue Maintenance

None

Asset Registry → Filter: Status=MAINTENANCE or Overdue →
View assets with past maintenance dates (red indicator) →
Schedule maintenance → Update date

Persona 5: Elected Representative (MLA / Councillor)

Role Code: ROLE_REP

System Scope: Assigned constituency/ward

Profile

Attribute	Detail
Who	Ward Councillor, MLA, Sarpanch
Goal	Monitor complaint resolution in their constituency
Pain Point	Citizen complaints go unresolved; no visibility
Device	Mobile, tablet

Capabilities

- View complaints in their ward (read-only)
- View map of their ward with complaint pins
- Receive SLA breach alerts
- Cannot modify any data

Key Workflows

1. Check Ward Status

None

Login → Dashboard →
 Map Dashboard → View complaint pins in ward →
 Identify hot-spots → Call TENANT_ADMIN for escalation

2. SLA Breach Alert

None

Receive Socket.IO notification: "Complaint CMP-GVM-202506-041
 breached SLA" →
 Open complaint → Review status → Contact officer

Persona 6: Citizen (Self-Service)

Role Code: CITIZEN

System Scope: Own profile only

Profile

Attribute	Detail
Who	Resident, taxpayer
Goal	File complaints, track resolution
Pain Point	Opaque bureaucracy, no follow-up
Device	Mobile (primary), web

Capabilities

- Register via OTP
- File complaints (with GPS)
- Track own complaint status
- Receive notifications when resolved

Lifecycle

Complaint → Register → File Complaint → Track → Receive Resolution → Rate Experience

Key Workflows

1. File a Complaint

None

Login (OTP) →
Complaints → New Complaint →
Enter: Title, Description, GPS auto-detected or manual →
Submit → Get complaint number CMP-GVM-202506-041

2. Track Complaint

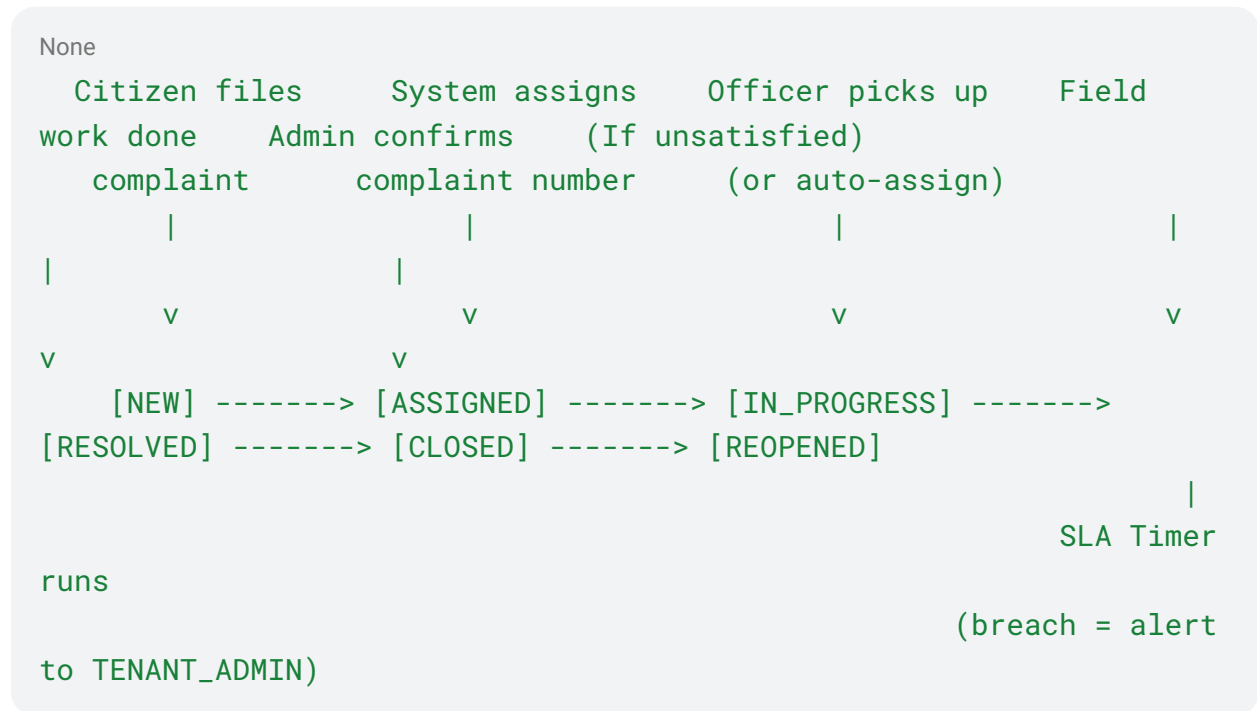

None

My Complaints → Select CMP-GVM-202506-041 →
View: Status timeline (NEW → ASSIGNED → IN_PROGRESS → RESOLVED) →
Receive push/SMS notification on status change

Core User Lifecycles

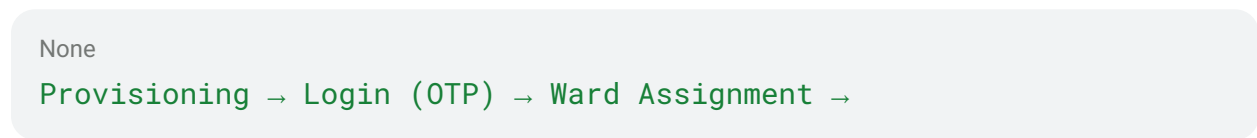

1. Complaint Lifecycle

SLA Thresholds (configurable per tenant):

Priority	Resolution SLA
CRITICAL	4 hours
HIGH	24 hours
NORMAL	72 hours
LOW	7 days

2. Officer Lifecycle

Daily Duties → Workload Tracking → Performance Review → Promotion/Deactivation

3. Document / Peshi Lifecycle

None

[DRAFT] → [RECEIVED] → [IN_TRANSIT] → [RECEIVED at desk] → [ARCHIVED]

|
Physical file movement
tracked by "Current Desk" field
Notification on each movement

4. Asset Lifecycle

None

[REGISTERED] → [ACTIVE] → [MAINTENANCE] → [ACTIVE] → ... → [DECOMMISSIONED]

|
Maintenance scheduled
Alert 7 days before next maintenance

5. User Onboarding Lifecycle

None

TENANT_ADMIN creates user →
System assigns temp credentials (OTP-only) →
User logs in with phone OTP →
First login: System prompts profile completion →
User assigned to ward →
User begins operations

Role x Module Access Matrix

Module	SUPER_ADMIN	TENANT_ADMIN	DEPT_HEAD	OFFICER	REP	CITIZEN
